

Spray Bottle Activities for kids

WATERING NATURE

Take a spray bottle with you on your next nature walk with the kids. Ask them to “water” the flowers, trees, and rocks they see!

A-Z FLOWERS

Draw 26 flowers with chalk. In the center of each flower write a letter A-Z. Call out a letter name and ask your child to identify the letter by spraying the flower.

SPRAY CHALK

Add Cornstarch to 1 cup of hot water. Add 1 tsp of washable paint and a squirt of dish soap. Mix well. Add to a squirt bottle and go outside to paint the fence!

WINDOW ART

Cut different shapes out of a foam sheet. Spray a window with water and stick the foam shapes to the window to make an art scene.

TARGET PRACTICE

Go outside and stack ball-pit-balls on top of upside down cups. Try to shoot the balls off of the cups only using the water from the spray bottle.

CAR WASH

Fill a bucket with water and some dish soap. Toss in some scooping tools, cups, sponges and toy cars. Add a spray bottle and clean the cars.

FIZZY SCIENCE

Fill a spray bottle with vinegar. Add several drops of food coloring to the bottom of a serving tray. Cover the bottom of the tray and the drops with baking soda. Spray the baking soda and watch the mystery colors appear!
